

# means dependability in **SPROCKETS**

**Since 1955** Dalton has developed into a fully equipped plant covering almost 50,000 square feet. This growth is the result of a combination of skill and know-how in production, plus the special attitude of Dalton personnel and management which focuses on one objective... complete customer satisfaction.

This Dalton attitude is reflected in every phase of operations. Dalton management understands the needs and problems of customers. Dalton engineering and production personnel take real pride in producing products of consistent high quality that adhere rigidly to specifications. Doing the job right the first time is the everyday aim at Dalton.

## **DALTON** gear company
